Training

We offer an extensive range of high quality, open or in-company training courses which embrace a large number of subject areas, all designed to aid effective decision-making in the workplace. Our in-company courses enable us to meet the needs of specific delegate groups or to support the overall aims and objectives of organisations.

Our courses are all designed to equip delegates with the essential skills and knowledge that will help promote confidence and ensure that informed and effective decisions are made at the work place. With a combination of commercial and academic experience, UGCS trainers all bear the mark of true professionals, keen to impart their knowledge and expertise.

Project Management

We manage a range of initiatives designed to support the needs of small organisations through to multinational companies. Businesses are taking advantage of a variety of European and other state funded programmes that are available to help undertake any scale of project:

TCS enables businesses to access the range of experience in universities. Benefiting from funding of up to 60%, all types of business are committing to strategic development to guarantee a future in their respective markets.

HELP Wales creates sustainable success in a business by providing 50% European funding and applying University expertise to solve problems and exploit new ideas.

Club Européen aims to advise businesses of their obligations under European Directives and the resulting National Legislation. Particular emphasis is placed on the impact of CE Marking and its effects on SME's and multi-nationals alike.

Consultancy

Our responsive service for business needs, however large or small, utilises the wide scope of expertise available within the University. We offer specialist problem-solving skills and impartial advice on the best way to help your business move forward. From product development to marketing plans, we will assist you in harnessing the wealth of expertise available to enhance your business.

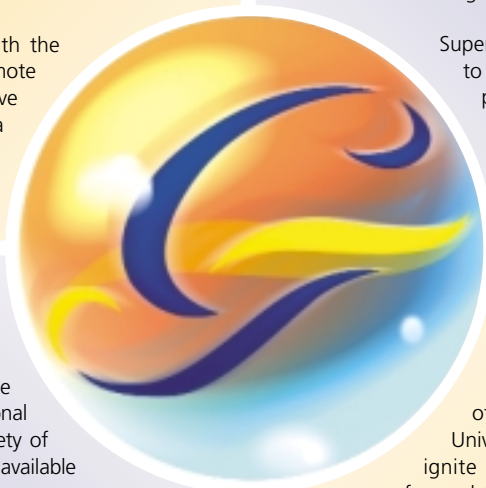

Superb research, development and testing facilities are on hand to ensure you receive all the support you need to make your project a success. Businesses can take advantage of a range of schemes and partnerships to maximise the resources on offer, and in many cases grant funding is available to help tackle projects lasting from one day to several years.

Innovation

Developing new products and processes are the lifeblood of company growth and, in many cases enable survival. Universities are the natural sources for new ideas that can ignite the innovation process and, once developed help safeguard the future of businesses. We are actively supporting the expansion of the commercial exploitation of knowledge and ideas for the benefit of the regional economy, making use of programmes such as:

The Wales Spinout Programme provides support for people who want to start a new business in conjunction with a Higher Education Institution, and can help with premises, finance, technical and business expertise.

The Knowledge Exploitation Fund's mission is to enable Universities and Colleges to engage in technology transfer, exploitation of intellectual property and to support Welsh SME's from start up to mature phases in their development.
